CAREER OBJECTIVE

Motivated TY BCS student specializing in Data Science and Data Analytics, with knowledge of Python, SQL, Java, C, C++, and frontend development. Seeking an entry-level opportunity where I can apply my technical and analytical skills, work on real-world projects, learn new technologies, and contribute effectively to the organization.

EDUCATION

KVN Naik Arts, Commerce and Science College **2025-2027**

Bsc(Computer Science) **Pursuing**

TECHNICAL SKILLS

Programming: Python, Java, C, C++
Data Science & Analytics: Data Analysis, Data Cleaning, Data Visualization, Pandas, NumPy, Scikit-learn, Machine Learning Basics
Database: SQL, PostgreSQL, MySQL
Web Development: HTML, CSS, JavaScript
Tools: Microsoft Excel, VS Code, Git/GitHub
Concepts: Problem Solving, Database Management, OOP, Data Structures Basics

ACADEMIC PROJECTS

Title : SkillDNA AI – AI Career Genome Analyzer.

- **Main Goal**: Analyze users' skills, resume information, and career goals to identify suitable career paths and skill gaps.
- **Programming Language:** Python
- **Frontend:** HTML, CSS, JavaScript
- **Backend**: Flask (Python)
- **Database:** PostgreSQL
- **Resume Analysis:** Extracts and analyzes relevant skills and information from user resumes.
- **Skill Gap Analysis:** Compares users' existing skills with the skills required for selected career goals.
- **Career Recommendation:** Recommends suitable career paths based on user skills, resume information, and career goals.
- **Roadmap:** Provides a personalized learning roadmap to help users improve their skills and achieve their selected career goals.
- **Admin Module:** Allows administrators to manage users, skills, career goals, and analysis data.

Title : Vehicle Service Management System

- **Main Objective:** Manage vehicle service records, customer details, service history, and maintenance activities in one place, reducing manual work and improving service management.
- **Frontend:** HTML, CSS, and JavaScript — creates a user-friendly and responsive interface for managing vehicle and service information.
- **Backend:** Python with Flask — handles application logic and manages communication between the frontend and database.
- **Database:** MySQL/PostgreSQL — stores customer, vehicle, service, and maintenance records securely.

- **Service Management:** Maintains service details, service dates, vehicle information, and service history.
- **Customer Management:** Stores and manages customer information along with their registered vehicles.
- **Contribution:** Worked on frontend development and database integration.

COURSES

Data Science & Data Analytics **Currently Pursuing**
Fortune Cloude Technology, Nashik.

C,C++,Java
Quality Educational Institute of Computer Technologies **March 2026**

SOFT SKILL

Creative Thinking , Teamwork, Adaptability, Quick Learning, Time Management.

COMMUNICATION LANGUAGES

- ENGLISH
- MARATHI
- HINDI
